Walk lasted between 12:00 and 14:20. Tournament Park was closed.

Well, the streak of records stopped. We did not get our 6th record in a row. We observed 22 species and the record for the week is 23, so we got close. We missed a 100% probable bird, the American Crow. But, we can't complain too much as we saw 5 zero-probability birds! Note that I have added a column for probability of observing, based on the last 7 years of observations. This was at the request of Viveca and I like it. The notable bird this week was any of the zero probables, but the Killdeer is my personal favorite. Just love a Killdeer. American Pipit and Western Kingbird run a close 2nd and 3rd.

We had a new walker this week: Nancy Wall. Welcome Nancy. You are the 196th walker to walk the walk. Hope to see you again soon.
